CONFIDENTIAL — FOR INVESTIGATION PURPOSES ONLY

Prepared by: Cirqus Heresy Investigation Unit
Date: March 11, 2026

EXECUTIVE SUMMARY

On October 31, 2024, the victim's cryptocurrency wallets (MetaMask, Trust Wallet) and exchange account (OKX) were compromised. Funds were stolen across multiple chains. The attacker converted OKX holdings to BNB and withdrew 1,088 BNB to an external address.

On March 9, 2026, while checking OpenSea, the victim discovered that their compromised wallet was connected to a profile named 'olddragon' containing 9 wallets total. The profile has linked social media accounts: Instagram (@millefleursdalat) and Twitter (@lifeisweb10).

As of March 11, 2026, the attacker continues to actively use the victim's MetaMask wallet, stealing airdrops (WCT tokens) and conducting transactions.
